

Entretiens Sur Les Vies Et Sur Les Ouvrages de Plus Excellens Peintres Anciens Et Modernes (1)

Filesize: 7.88 MB

Reviews

This book may be worth purchasing. I am quite late in start reading this one, but better then never. Once you begin to read the book, it is extremely difficult to leave it before concluding.

ENTRETIENS SUR LES VIES ET SUR LES OUVRAGES DE PLUS EXCELLENS PEINTRES ANCIENS ET MODERNES (1)

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 38 pages. Original publisher: Boulder, Colo. : National Renewable Energy Laboratory, 2005 OCLC Number: (OCoLC)225544814 Subject: Energy development -- United States -- Appropriations and expenditures. Excerpt: . . . Goal To fabricate blue and blue-green light emitting diodes (LED) out of a novel material, Cadmium Magnesium Telluride (CdMgTe). Investment Outcome Kannan Ramanathan and his team fabricated the first polycrystalline thin films made of CdMgTe - overcoming equipment and staffing problems. They set up a new fabrication facility that uses effusion cells. The fabricated films are a fine example of multi-component alloy preparation using combinatorial synthesis. With two depositions, they can cover the composition range of 1. 4 eV to 2. 2 eV. They have established the basic properties of the alloys such as energy gap vs. composition and they are sending a paper to Applied Physics Letters. Value of the Outcome Significant progress has been made to achieve the objective of LED device fabrication. This work can potentially provide a new avenue for DOEs research in solid state lighting. Next Steps Kannans team plans to fabricate the LEDs in FY06. A side benefit is that this same material can be used to develop a wide bandgap solar cell out of the 1. 7 eV material. OWLEDs: Next Generation Indoor Lighting Using Organic White Light Emitting Diodes Principal Investigator: Sean Shaheen Award: 500, 000 Period of Performance: April 2003 to March 2005 Status: Completed Goals To perform fundamental research on organic semiconductors and organic inorganic hybrid nanostructured materials with the end goal application of low cost, high efficiency solid state indoor lighting from organic white light emitting diodes (OWLEDs). To develop a core competency at NREL in the area of organic semiconductors and...
